Guest Speaker Betty Webb

'A Minor Cog in a Major Wheel'

Bletchley Park was the site of the UK's main decryption establishment, the Government Code and Cypher School (GC&CS), where ciphers and codes of several Axis countries were decrypted, most importantly the ciphers generated by the German Enigma and Lorenz machines. It also housed *Station X*, a secret radio intercept station. Betty worked at Bletchley Park and will be sharing stories and memories of her time there. She will also bring along some illustrations and interesting information for us to look at.

BLETCHLEY PARK
National Codes Centre
